

Your smart phone just got smarter

Whether in a pre-hospital or facility setting, FirstNet gives emergency medical and healthcare professionals the ability to reliably share information. **Plus, you get:**

- > **Heightened security** to safeguard data and resist physical and cyber threats
- > **Prioritized access** – never competing with commercial mobile users
- > **Affordable rate plans** and industry-leading devices

With reliable connectivity and smart devices, FirstNet Verified™ and FirstNet Certified™ apps advance your care with practical and highly secure tools.

 <p>FirstNet® Push-to-Talk: Provides high performing push-to-talk 3GPP communications</p>	  <p>PulsePoint Response & AED: Alerts nearby CPR-trained persons who can assist before medics arrive</p>
 <p>FirstNet® Messaging: Delivers reliable messaging with features built especially for first responders</p>	  <p>EMResource & EMTrack: Shares awareness of available resources, space, and supplies</p>
 <p>FirstNet® Assist: Facilitates priority uplift for your critical support and quick access to dedicated care</p>	  <p>Pulsara & e-Bridge: Enables collaborative care coordination and telehealth</p>
