

# TBI Dashboard: Insights for Patients with Traumatic Brain Injury

Traumatic brain injury (TBI) patients present a unique set of challenges

Early management vs. early treatment is critical to minimize common secondary injuries.<sup>1</sup>

With TBI Dashboard on ZOLL's new X Series® Advanced monitor/defibrillator, rescuers have the vital information they need to rapidly treat and effectively manage TBI patients.

## Management of ventilation

X Series Advanced integrates Real BVM Help® into the TBI Dashboard to help prevent hyperventilation. It provides real-time ventilation feedback on both rate and volume for patients managed with simple BVM or an advanced airway, allowing high-quality ventilation.

### TRENDING OF CRITICAL VITAL SIGNS

TBI Dashboard shows trending data on the parameters most critical to treating TBI patients.
